

TECHNICAL ASSISTANCE

The result of Mobility's engineering expertise, Doway offers optimised solutions for transport infrastructures to reduce the cost of integration and operation.

Design, studies and consultancy

- ✓ During the design phase for advice on optimised solutions
- ✓ During the operation phase to ensure project plans are followed
- ✓ Support to ensure teams have the necessary expertise

Operational safety engineering

- ✓ Ensure overall system performance via a recognised scientific approach throughout the life cycle
- ✓ Use proven scientific tools to demonstrate the safety of the designed system

Network simulation, sizing and optimisation

- ✓ Optimise consumption on existing lines
- ✓ Size the energy network appropriately for future lines
- ✓ Anticipate network developments

know all on Doway Mobility solution to reduce the cost of integration and operation.
