

## OUR RESPONSIBILITIES

*Because our achievements have a major impact on cities, territories and their inhabitants, Mobility aims for technical, environmental and social performance, in a long-term relationship with all of its stakeholders.*

We operate as a town and country planning player. Throughout the life of our projects, we are committed to ensuring the following:

- ✓ **Technical performance for users**
- ✓ **Environmental and societal performance**
  - ✓ Protection of biodiversity according to the principle: AVOID (important biodiversity sites), REDUCE (important biodiversity sites), COMPENSATE (important biodiversity sites), OFFSET (residual impacts).

**A corporate citizen**  
We don't design infrastructure without analysing its impact – environmental impact, of course.

[Read more](#)

**Our Expertise**  
The performance of an infrastructure is also measured in terms of comfort, security, reliability and the capacity for action that it brings to its users.

**Our Large Projects**  
All over the world, we work on major structuring projects: high-speed lines, urban roads, tunnels, tram lines...
